

# EXPERIMENT – 03

## VEHICLE SERVICE REQUEST FORM

240701020 - ADITYA S

### 1. Objective

To design and build a functional "Vehicle Service Request Form" application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real automobile service-center requirement of scheduling and pre-recording vehicle service and repair requests.

### 2. Problem Statement

An automobile service center currently accepts service requests through phone calls, leading to double-booked service bays, no advance record of the reported problem, and no way for technicians to prepare parts or estimates before the vehicle arrives. Walk-in customers often wait long hours because there is no prior scheduling system.

Design a low-code application using Zoho Creator that allows a vehicle owner to submit a service or repair request through a single online form. The form must capture owner identity, contact details, vehicle details, issue description, preferred service schedule, and authorization for the service center to proceed — using every Basic Field type provided by Zoho Creator's Form Builder.

### 3. Scope of the Use Case

| Item                    | Details                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------|
| Application Name        | Vehicle Service & Repair Request Management                                                                 |
| Form Name               | Service_Request_Form                                                                                        |
| Primary Users           | Vehicle owners / Service Center Front Office and Technicians                                                |
| Report View             | Service_Request_Report (list of all submitted service requests)                                             |
| Objective of the Report | Enable the service center to filter, schedule, and assign technicians for incoming vehicle service requests |

### 4. Basic Fields Used and Their Mapping

The following table maps every Basic Field from the Zoho Creator Form Builder palette to its role in the Vehicle Service Request Form.

| Basic Field | Form Field Name             | Purpose                                                                                           | Sample Value                                                                         |
|-------------|-----------------------------|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Name        | Owner_Name                  | Captures the full name of the vehicle owner using First/Last name sub-fields                      | Ramesh Kannan                                                                        |
| Email       | Email_Address               | Captures a validated email address for sending the service estimate and status updates            | ramesh.kannan@example.com                                                            |
| Address     | Pickup_Address              | Captures the owner's address for a pickup/drop service, if requested                              | 9, Cross Street, Salem, TN, 636001                                                   |
| Phone       | Contact_Number              | Captures a validated mobile number for the service center to call with updates                    | +91 93450 66778                                                                      |
| Single Line | Vehicle_Registration_Number | Captures a short free-text entry for the vehicle's registration/number plate                      | TN 34 AB 5678                                                                        |
| Multi Line  | Issue_Description           | Captures free-text description of the problem the vehicle is experiencing                         | Unusual grinding noise from the front brakes and reduced mileage over the last week. |
| Number      | Odometer_Reading            | Captures a numeric value with validation for the vehicle's current odometer reading in kilometers | 45230                                                                                |
| Date        | Preferred_Service_Date      | Captures the owner's preferred date to bring in the vehicle, using a date picker                  | 30-Jul-2026                                                                          |
| Time        | Preferred_Dropoff_Time      | Captures the owner's preferred time slot to drop off the vehicle at the service bay               | 9:00 AM                                                                              |
| Drop Down   | Vehicle_Type                | Presents a single-select list of vehicle categories serviced by the center                        | Hatchback                                                                            |
| Radio       | Service_Type                | Captures a single mandatory selection among mutually exclusive service categories                 | Breakdown Repair                                                                     |

|              |                               |                                                                                                |                                            |
|--------------|-------------------------------|------------------------------------------------------------------------------------------------|--------------------------------------------|
|              |                               |                                                                                                |                                            |
| Multi Select | Additional_Services_Requested | Allows the owner to select more add-on services along with the main repair                     | Car Wash, Interior Cleaning, Tyre Rotation |
| Checkbox     | Authorize_Estimate            | Captures authorization for the service center to prepare an estimate and proceed with the work | Checked (Agreed)                           |

5. Form Layout (Section-wise)

Section A — Owner Details

Owner Name (First Name, Last Name)

Vehicle Registration Number (Single Line)

Vehicle Type (Drop Down)

Section B — Contact Details

Email Address (Email field)

Contact Number (Phone field)

Pickup Address (Address field)

Section C — Vehicle & Issue Details

Odometer Reading (Number field)

Service Type (Radio: Routine Service / Breakdown Repair / Accident Repair)

Additional Services Requested (Multi Select)

Issue Description (Multi Line)

Section D — Scheduling & Authorization

Preferred Service Date (Date field)

Preferred Drop-off Time (Time field)

I authorize the service center to prepare an estimate and proceed (Checkbox)

## 6. Validation Rules to Configure

Owner Name, Phone, Vehicle Registration Number, Vehicle Type, Service Type, and Authorization Checkbox are mandatory fields.

Email field: built-in email format validation enabled.

Phone field: country code format enabled for Indian numbers.

Number field (Odometer Reading): restrict to a positive value only.

Date field: restrict Preferred Service Date to disallow past dates.

Checkbox (Authorization): form cannot be submitted unless checked.

## 8. Expected Learning Outcomes

Understand the purpose and correct use case for each Basic Field in Zoho Creator.

Learn how to structure a service-request form into logical, customer-friendly sections.

Practice configuring field-level validations (mandatory, format, and range checks).

Understand how form field values feed into report views and service-scheduling workflows.

## 9. Deliverable for This Lab Exercise

Students must build the Service\_Request\_Form in Zoho Creator exactly as specified above, apply the listed validations, generate the Service\_Request\_Report, and submit a screenshot-based lab record showing:

(a) the form in Form Builder with all 13 fields,

(b) a live preview of the form,

(c) at least three sample submitted records in the report view.

## Result

The Service\_Request\_Form was designed in Zoho Creator using all thirteen Basic Fields, with the specified section-wise layout, validation rules, report view and service-scheduling workflow. Screenshots of the completed implementation and sample records are to be attached in the spaces provided above.
